

Spring Core Maven

Exercise 1: Configuring a Basic Spring Application

Scenario:

Your company is developing a web application for managing a library. You need to use the Spring Framework to handle the backend operations.

pom.xml

BookRepository.java

BookService.java

applicationContext.xml

MainApp.java

mvn exec:java '-Dexec.mainClass=com.library.MainApp

Exercise 2: Implementing Dependency Injection

Scenario:

In the library management application, you need to manage the dependencies between the BookService and BookRepository classes using Spring's IoC and DI.

Project Structure

applicationContext.xml

BookService.java

MainApp.java

Terminal

Exercise 4: Creating and Configuring a Maven Project

Scenario:

You need to set up a new Maven project for the library management application and add Spring dependencies.

pom.xml

mvn dependency:tree

mvn compile
